

What is an ASC?

Ambulatory Surgery Centers (ASCs) are highly regulated health care facilities that provide outpatient surgery and preventive care. For many health care procedures, ASCs are the right choice for the right patients at the right price.

More than **80%** of surgeries are now done in an outpatient setting.

✓ Right Choice

ASCs provide excellent value through high-quality outcomes and lower cost care.

ASCs meet extensive state and federal requirements and are reviewed regularly to **ensure safety and quality**.

A growing body of research demonstrates **exceptional outcomes** in ASCs. In fact, ASC patients are less likely to be admitted to the hospital for post-surgery complications.

✓ Right Patients

ASCs have **led innovations** that have transformed outpatient surgery.

New technology and techniques have made outpatient surgery **safer and more comfortable**. ASCs only treat patients who qualify for outpatient treatment.

As America's baby boomers age, there is **increasing demand** for the services ASCs provide. More than 49 million people, or 15 percent of the U.S. population, are now 65 or older.

The share of Americans 65 and older will grow from 15% in 2016 to **24% of the overall population in 2060**.

✓ Right Price

ASCs **reduce expenses** for patients, insurers and Medicare.

Medicare patients saved **\$1.5 billion** in 4 years

\$42.2 BILLION

One-year savings in health care spending created by patients choosing ASCs.

\$4.2 BILLION

Annual Medicare savings created by patients choosing ASCs.

The Ambulatory Surgery Center Association is a national association that represents more than **5,900 ambulatory surgery centers** (ASCs) across the U.S.
